Re: Camp Walden Onsite Wastewater Treatment System
(T) Bolton, Warren Co.

Dear Ms. Dixon:

The Lake George Waterkeeper has recently received copies of various correspondences from the New York State Department of Health office regarding the above referenced project. Our office has also provided public comment to the Town of Bolton Planning Board regarding the wastewater treatment of three proposed cabins for the same project.

I would like to provide your office with a copy of the letter regarding the wastewater treatment systems to hopefully review and incorporate into your detailed review. As noted in our letter, there are several items with the current design which are not compliant with the regulations or require additional clarification.

Thank you for the consideration of these comments. I look forward to working with the New York State Department of Health in defending the natural resources of the Lake George basin.

Sincerely,

Christopher Navitsky, PE
Lake George Waterkeeper
